Dear guests,

In this letter we would like to tell you shortly about The Viking Group

Everything started with meeting of Can Kobal and Ibrahim Yildirim in 1994. Spending 10 years in Norway, Ibrahim returned back to Turkey, while Can returned from London. They have been founded Travel company and started bringing guests in Kemer from Norway and Sweden. The number of visitors annually increased so the next step of their activities became the construction of the very first hotel - the start of Viking Hotels chain.

Gradually for guests, who returned back more and more, Kemer became the most beloved place and their "second home". They wanted not only to relax here but also to have their own property. In 2003 following customer wishes the Viking group started a new project - development. Over 20 years of successful work more than 1400 different types of housing have been designed and built in 40 projects in and around Kemer, making The Viking Group the largest developer in the region.

In its work the Company follow to the main principle - respect for human being and nature, therefore it builds housing, skillfully combining architecture and the environment. Another important principle is the creation of a long-term relationship that goes far beyond the signing of a contract.

What makes the Viking Group projects outstanding

- apartments turnkey (furniture and all household appliances are included in the price)
- constant support in solving all domestic issues
- flexible payment terms: installments up to 2 years not only for apartments under construction, but also for finished apartments
- unlimited access to hotel services with VIP-card: beaches, swimming pools, sports clubs, hamams, Turkish night parties

We offer you a unique opportunity to touch the world of Turkish real estate during a free familiarization tour, which takes place every day **at 10:00 and 17:00** lasting 1 hour.

Join now!

In addition **once a week** at the hotel we have a meeting dedicated to investments and buying real estate in Kemer.
